SECTION 11 GENERAL NOTES	
No	ITEM
1	<p>GRADUATES</p> <p>It is important that graduates communicate to their employer the requirements for PROFESSIONAL MEMBERSHIP listed in Note 2 below</p>
2	<p>PROFESSIONAL MEMBERSHIP</p> <p>The attainment of Professional Membership to a recognised Institution is an important step in the development of an engineer and we attach these notes to enable any Applicant to judge whether or not they are ready for this major step and are likely to be successful in their application. The broad rule of thumb that the evaluation committee is required to establish is that the Applicant is sufficiently experienced in the broader aspects of engineering to enable him / her to be able to act ON THEIR OWN with full responsibility for their own actions and to fully realise the faith that the general public places, and is entitled to place, in their expertise. In order to evaluate this preparedness, the evaluation committee will be looking at the experienced gained since graduations in the fields of:</p> <ol style="list-style-type: none"> <li>1. Design</li> <li>2. Supervision</li> <li>3. Documentation, particularly in regard to Conditions of Contract, Conditions of Tender and responsibility for the actions they make</li> <li>4. Ethics</li> </ol> <p>For the first three of these items, it is normally expected that the Applicant has had at least one year in each item in a position that enables him/her to develop skills in these vital areas of engineering. The fourth item is self-explanatory and clearly explained in the Articles of Engineers Fiji.</p>
